Summary

Motivated and job-ready Full Stack Developer skilled in the MERN stack (MongoDB, Express.js, React.js, Node.js) with hands-on experience building real-world applications such as AI Interview Platform and Expense Tracker. Proficient in building scalable, secure, and responsive web applications using JWT, Redux, Tailwind CSS, and RESTful APIs. Strong problem-solving abilities with a collaborative mindset and passion for continuous learning. Seeking an internship or full-time opportunity to contribute effectively to dynamic development teams.

Education

JMS Group of Institutions, Hapur

August 2022 – Present

Bachelor of Computer Applications (BCA) – Second Year Completed Expected Graduation: May 2025

| • JavaScript | • ReactJS | • MongoDB |

Projects

I Prep – AI Interview Platform

MERN Stack

- Built an AI-based interview preparation tool using React, Node.js, MongoDB, and Google Gemini.
- Generated role-specific questions dynamically using LLM prompts.
- Simulated mock interviews with real-time conversational AI interface.
- Implemented JWT authentication, Redux state management, and React Router for secure and dynamic routing.
- Deployed on Vercel with a fully responsive UI.

Expense Tracker

MERN Stack

- Developed a full-stack application to track income and expenses with real-time analytics.
- Implemented category-wise filters, pie and bar charts, and budget analysis features.
- Built secure RESTful APIs with JWT authentication and bcrypt password hashing.
- Designed mobile-first responsive UI and deployed on Vercel.

Technical Skills

- **Languages:** JavaScript, Python, C++, Java, SQL, Go
- **Tools:** Git, GitHub, VS Code, Postman
- **Frameworks:** React, Redux, Node.js, Express.js, Next.js, MongoDB
